

RALCO

RALCO PLEX
BR-15N

RALCO PLEX BR-15N High speed bearing grease.

Product Introduction

RALCO PLEX BR-15N is a multi - purpose grease with special barium soap as thickener lubrication noise reduction, shear resistance, extreme pressure wear resistance, water resistance, high temperature resistance and oxidation resistance, widely used in various textile industry bearings and motors, noise reduction and lubrication of gears, door locks and chassis in automobile.

Product Advantages

- Excellent film retention, long - acting lubrication;
- excellent resistance to water and oxidation;
- excellent shear stability;
- effectively reduce the metal motor gear friction noise and vibration absorption
- good low temperature start performance;
- good high temperature resistance;

Product Usage

- Machine tool bearing;
- textile machinery;
- lubrication of ball bearing,
- roller bearing and sliding bearing;
- Used for industrial valves; lubrication of parts of various measuring devices;
- lubrication and noise reduction of gear, door locks and chassis in automobile.

TECHNICAL PROPERTIES

Test Items		BX-300/F(BR-15N)	Test Methods
Color appearance	:	Cream even paste	Visual inspection
Base oil	:	Synthetic oil PAO	GB/T 269
Thickener	:	Compound Barium	
Penetration 1/10mm,25℃	:	265-295	GB/T 269
Consistency value (NLGI)	:	2	
Working temperature ℃	:	-20℃ to +220℃	
Drop point ℃	:	>250℃	GB/T 3498
Copper corrosion (100 ℃ / 24Hrs)	:	qualified	GB/T 7326
Water loss (120℃,22h)%	:	<2.0%	SH/T0109
